As a video production specialist, I have applied my art direction skills and Adobe Creative Suite expertise to create engaging and visually appealing videos for various clients and projects. I have worked with Delta Galil Industries, a leading global manufacturer and marketer of branded and private label apparel products, to film and edit a commercial video for their clothing brand Splendid in November 2019. This was a significant project that showcased my ability to produce high-quality videos that capture the essence and style of the brand. I have a passion for video production and a keen eye for design and aesthetics. I am always eager to learn new skills and techniques, and to collaborate with other creative professionals. I am looking for new opportunities to use my video production skills and experience to create impactful and innovative videos for diverse audiences and purposes.
